Frequently Asked Questions FAQs

1 What type of compost is best for nodig gardening The best compost for nodig gardening is wellrotted mature compost that is dark crumbly and relatively free of large pieces of undecomposed material Avoid using fresh manure as this can burn plants A mix of green and brown materials is ideal

2 How much compost should I add The amount of compost you add depends on the condition of your existing soil and the size of your beds Aim for a minimum of 6

inches of compost and organic matter over the existing soil Adding layers throughout the growing season is better than one large application 3 What if I have a lot of weeds A thick layer of mulch at least 46 inches will significantly suppress weed growth Regularly remove any weeds that do emerge but the overall weed pressure should be drastically reduced with the nodig method 4 What happens during winter in a nodig garden During winter the soil remains undisturbed A thick layer of mulch protects the soil from frost and erosion maintaining soil health throughout the cold months The organic matter continues to decompose enriching the soil for the following growing season 5 Can I use the nodig method in containers Yes you can adapt the nodig method for containers Instead of layering directly onto the ground layer compost and organic matter into the containers before planting Ensure your 4 containers have adequate drainage This comprehensive guide provides a strong foundation for your nodig gardening journey using the wisdom of Charles Dowdings Veg Journal Remember to adapt the approach to your specific climate and conditions and always observe and learn from your gardens response Happy gardening
